## Education

| Lahore, Pakistan | University of Engineering and Technology | Nov 2021 \| May 2025 |
|---|---|---|

- BS in Computer Engineering. CGPA: 3.1/4.0

## Work Experience / Freelancing

| Frontend Developer | Bizsecure | August 2025 – Present |
|---|---|---|

- Developing a B2B marketplace frontend with buyer, seller, and admin modules using React, Next.js, and Tailwind CSS.
- Implementing authentication & authorization flows, OTP login, documents verification, and secure API integrations.
- Building admin panel dashboards for user management, product control, reviews, and smart search filters.
- Creating responsive, reusable UI components with optimized performance and real-time updates.

## Technical Skills

- Frontend Development: React.js, Next.js, Redux.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- Tools: Git, GitHub, Jira, Docker, Postman
- Testing: Jest, Unit Testing, Integration Testing, React Testing Library.

## Projects

- **Netflix-Style App** (https://netflixgpt-f6131.web.app/)
  Built a Netflix-style app with Firebase Google Authentication for movies recommendations. Integrated AI-powered movie suggestions using GPT-3.5-turbo and real-time content via TMDB API.
- **Recipe Finder** (https://recipefinder-web-app.web.app/)

  Developed a web app to search recipes by name, category, or cuisine; and managed state with Redux. Implemented dynamic routing and 15+ unit & integration tests with Jest for reliability.
- **YouTube Clone** (https://fir-ad80a.web.app/)

  Built a YouTube clone with debounced search and Redux LRU caching, reducing API calls by 60%. Implemented dynamic routing, mock live chat, and deployed the app on Firebase.
- **Dessert Shop – Multilingual** (https://dessert-shop-641cc.web.app/)

  Built a multilingual (EN/FR/DE) dessert shop with reusable HOCs for badges and dynamic content. Designed a scalable, responsive UI, achieved 90+ Lighthouse score, and deployed on Firebase.
- **Amazon-Style E-Commerce App** (https://fir-d25e5.web.app/)

  Built a shopping plat- form with dynamic routing and category-based product rendering via DummyJSON API.

  Wrote 18+ unit tests, and implemented skeleton loading with custom shimmer effects to ensure reliability, scalability, and improved user experience during API fetch states.

## Certificates

- **Jira** (SkillUP) 2025
- **React** (NamasteDev) 2025
